### Champion Valkyrie - Distance Driver

click a tab to select a disc with...

**Classification:** Distance Driver  
**Diameter:** 21.2cm  
**Weight Range:** 150 Class to 175 grams  
**Brief Description:** Turnover Distance Driver with great glide. [Juliana Korver](#)'s driver of choice.  
**Available Plastics:** DX, Pro Line, Champion, Star  
**Best Choice for:** First distance driver, tailwind drives, downhill distance, long turnover drives, rollers.

**About the Valkyrie**  
 The Valkyrie is a World Record holding distance driver. It is an easy to learn disc, and in lighter weights will give newer players extra distance. Lighter weights also give players extreme range when thrown downwind, while maximum weights can give excellent upwind distance. The Valkyrie's high speed turn and flight characteristics make it great choice for long range turnover shots and rollers.

**About INNOVA's Champion Plastic**  
 INNOVA's Champion Line is produced with a unique plastic that provides outstanding performance and durability. Champion discs are distinguished by a clear or pearlescent plastic. Our Champion

**Speed** - Speed is the ability of the disc to cut through the air. Speed ratings are listed from 1 to 13. For more info on Speed, [click here](#).

**Glide** - Is the ability to maintain altitude. Higher numbers mean more glide. Rated 1 to 7. For more on Glide, [click here](#).

**Turn** - Tendency to turn at high speeds. Negative numbers are easier for beginners, rollers, and tailwinds. For more on Turn, [click here](#).

**Fade** - Every disc will fade off in the same direction if allowed to decelerate. Higher numbers fade more than lower numbers. For more on Fade, [click here](#).

Line discs retain original flight characteristics for an extended period of time. Whether used in heavily wooded situations, or on extremely rugged courses, our Champion Line plastic will continue to perform predictably and avoid damage better than any other plastic. Originally designed for professional players, Champion Line discs can handle the increased power of top level players. The Champion Line has recently expanded to include most of our drivers as well as many of our popular disc models in other categories. Many Champion Line discs are now available for custom [hot stamping](#). Certain Champion models are available only through our successful [Candy Fundraiser Program](#).

**DX** - 150 Class to 175 grams  
**PRO** - 160 to 175 grams  
**CHAMPION** - 150 to 175 grams  
**STAR** - 150 to 175 grams

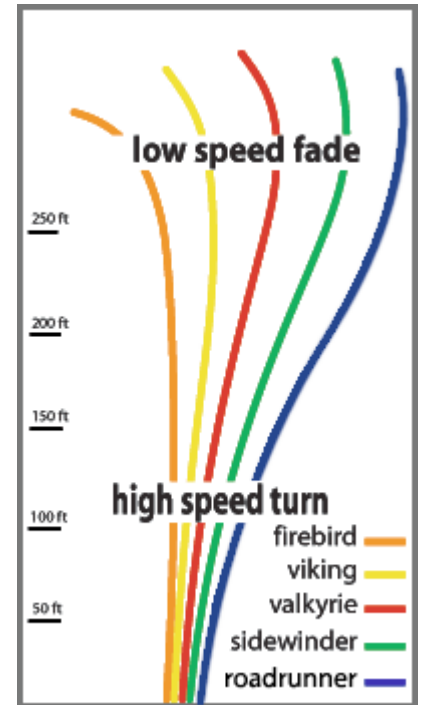

Also available for custom hotstamping in: DX, Champion

Full Color designs available in DX plastic. Custom Full Color stamping also available.

Innova Team Champion member, [Christian Sandstrom](#), of Sweden, shattered the distance record April 26, 2002 at "Big D in the Desert. His record throw of **250 meters (820 feet)** was made with a 164g [DX Valkyrie](#). Former team member Ken Jarvis was first to break the record with a throw of 247 meters. Ken's record lasted a mere 45 minutes! The previous record of 217.05m (712 feet) had been set by

[Chris Voigt](#) of Germany.  
Click the photo to see his record breaking form.

#### Looking for:

More high speed stability? Try a [Champion Viking](#).

More glide? Try a [Champion Sidewinder](#).

Faster? Try a [Pro Starfire](#) or [Champion Beast](#).

Slower? Try a [Dragon](#) or [Champion Eagle](#).

More Grip? Try a [Pro Valkyrie](#), [DX Valkyrie](#), or [Star Valkyrie](#).

Other Speed 9 discs? [Firebird](#), [Viking](#), [Sidewinder](#), [Roadrunner](#).

This is my favorite driver. It is an incredibly versatile disc for me. It works very well with my throwing style. I tend to throw low and the Valkyrie gets great distance with low thrown shots. I typically carry three Valkyries with me during a round (more if there is water). One is beat and used for long turnover shots. The others can be used for hyzers and subtle helix shots.
